

## I. Amendments to the Specification

Kindly amend the last full paragraph on Page 8, as follows:

Fig. 7 illustrates another embodiment of the present invention, container 210, in the nested position with a second like container 310. The containers 210, 310 are similar to containers 10, 110 in many respects, with the exception of vertical location of the support bars 212, 224 and 322, 324 and their relationship with like containers when stacked in the nested position, as well as the shape of their respective first floating pivots 260, 360. In this embodiment, containers 210, 310 are configured such that, when in the nested position, container 310 does not clear support bars 222, 224, but rather is supported on support bars 222, 224. Further, the first floating pivots 260, 360 are peanut-shaped ~~(or as clearly shown in Fig. 7, kidney shaped)~~. In another embodiment (not shown), the floating pivots 260, 360 are circular.
